

Environmental & Mineral Tenure Services

VISION

KB-MIC's vision is to develop and maintain a position as the distinguished geological consultancy of choice for both our employees and clients. Our focus will be primarily on Green and Brown field exploration in Africa.

We are considered "Competent Persons" by internationally recognized resource reporting standards (SAMREC, Ni43-101, and JORC) for Coal, Gold and Platinum Group Metals. Other commodities related experience includes Uranium, Copper, Iron-ore and Manganese.

CORE COMPETENCIES

KB-MIC's competitive advantage lies in its ability to offer clients integrated services from target generation through to CPR documentation for public companies.

Environmental & Mineral Tenure Services

KB MIC specialist area in the Environmental and Mineral Tenure services include assisting clients with mining, prospecting and exploration rights/permits application, conversion and renewal. We also conduct environmental impact assessment of mining projects, new development projects, linear developments, power generation and bulk infrastructures. KB-MIC offers expert advice to guarantee that its client's development needs and requirements are met cost effectively. KB MIC strives to work in partnership with our clients and in consultation with stakeholders, to make certain that sound environmental principles are integrated throughout the planning, design, implementation and commissioning stages of a project cycle.

Services Include:

- Environmental Feasibility Studies
- Environmental Management Programme/Plan ("EMPR")
- Environmental Impact Assessments ("EIAs")
- Environmental Management Framework ("EMF")
- Water Use License Application
- Waste Management Consulting Services
- Public Participation and Stakeholders Engagement
- Environmental Awareness and Training
- Social and Labour Plans
- Social Impact Assessments
